

Phillipsburg

Inserting System

Affordable, expandable, productive

The Bell and Howell's Phillipsburg® inserter is easy to operate, is equipped with the industry's best enclosure handling technology and includes advanced innovations, making this proven technology even more productive. The Phillipsburg inserter sets the benchmark for dependability and low cost per piece.

Your profitability and return on investment rely on having the fewest operators, maximizing production in a shorter run environment and controlling operating costs. The Bell and Howell Phillipsburg inserter is specifically designed to be run by a single operator. Phillipsburg is perfect for short to mid-length runs, comes equipped with advanced productivity management software and helps operators become highly efficient. Unmatched material flexibility, simple tool-free changeovers and the throughput to meet your schedule are a few of the many reasons Phillipsburg is the system our industry has come to depend on.

Whether you're a service bureau, direct mailer, lettershop or commercial printer, the ability to achieve the lowest possible cost per piece is critical to your business and bottom line. Bell and Howell's Phillipsburg inserter can help make your operations more productive and efficient with its low maintenance costs, ease of operation and flexibility.

KEY FEATURES & BENEFITS

- » Speed control maximizes machine performance
- » Tool-less adjustments enable quick job changeovers
- » Insert raceway and insert area are designed to control materials reducing the number of jams
- » LCD displays machine throughput and job statistics
- » Insert wedges and T-plates increase insert material capacity
- » Six- and twelve-station models available
- » Nationwide parts distribution network
- » 7 x 24 support coverage
- » Supported by Bell and Howell's professionally trained service technicians

Phillipsburg accommodates a wide range of inserts and envelopes to manage multiple applications with minimal adjustments. Job changeover is quick, maximizing equipment availability. Higher production volumes per shift result in a faster return on investment.

PROVEN DURABILITY

The Phillipsburg inserter has proven durability that makes it ideal for self-support organizations and those who require 7 x 24 operations. Its flexible architecture helps you meet current needs while remaining ready to expand as your needs grow and more functionality is required.

OPTIONAL FEATURES

- » Cut-sheet feeder
- » Reading technology
- » Processing of up to twelve pages
 - Eight-page maximum for letter or accordion fold
 - Twelve-page maximum for half-fold
- » Accumulation-before-fold capability
- » Easy conversion for front or rear mounting for all fold types and address locations
- » Standard set integrity functions
- » Demand feeding by count or read (end of set logic only)
- » Envelope marking by read

EQUIPMENT OPTIONS

- » JETVision® camera technology
- » Atomizer
- » Air assist package
- » End conveyors
- » Friction feeders
- » Insert folding devices
- » End fold for side-folded or bound inserts
- » Digital meters — fixed weight
- » Envelope marking by count
- » Infrared double document
- » Material flyback laser sensors

SPECIFICATIONS	
Max cycle speed	10,000 cycles per hour
Feeder types	<ul style="list-style-type: none"> » Gripper arm » Optional stream
Envelope sizes	<p>Minimum: 3.25" x 6" (82.6 mm x 152.4 mm)</p> <p>Maximum: 6.25" x 9" (158.8 mm x 228.6 mm)</p> <p>Flap depth: 1" x 2.31" (25.4 mm to 58.7 mm)</p> <p>Maximum collation thickness:</p> <ul style="list-style-type: none"> » Conveyor delivery model: 0.5" (12.7 mm) » Turnover delivery model: 0.38" (9.7 mm)
Insert sizes	<p>Minimum: 3" x 5.5" (76.2 mm x 139.7 mm)</p> <p>Maximum: 6" x 9" (152.4 mm x 228.6 mm)</p>
